Conference Description

This program will explore various facets of the importance of family centered care in the NICU, including biological foundations, innovative strategies, and implementations within diverse settings.

Target Audience

Nurses, physicians, respiratory therapists, physical therapists and occupational therapists working in the Newborn Intensive Care Unit, psychologists, early intervention developmental specialists

Learning Objectives

At the end of this educational program, participants will be able to:

- Understand the theoretical foundation for family-centered, developmentally supportive care.
- Identify strategies to implement family-centered care in diverse hospital settings.
- Gain insights into the experiences and potentials for support for families of hospitalized newborns.
