#### Conference Description

The purpose of this activity is to equip the learner with the knowledge to provide high level and evidence-based, developmentally supportive care to infants and families in Newborn Intensive Care Units (NICU).

#### Target Audience

Nurses, physicians, respiratory therapists, physical therapists, occupational therapists, speech-language pathologists, psychologists, and early intervention developmental specialists

#### Learning Objectives

At the end of this educational program, participants will be able to:

- Describe comprehensive NIDCAP approach to developmentally supportive care.
- Identify environmental factors that support families and infants.
- Describe ways to support parent-infant earliest communication.
- Analyze specific infant behaviors and suggest options for responding.
- Describe elements of relationship-based care.
- Discuss ways to advance developmentally supportive care into practice.
- Discuss how reflective practice applies to your role in the NICU.
- Problem-solve supportive care needs for infants and families.
